

Appl. No. 10/693,057

dated February 25, 2004

Reply to Notice to File Missing Parts of February 19, 2004

PATENT

REMARKS

Since numerous sequences which were not originally assigned identifiers occur in the peptide motifs found in paragraphs on pages 5-8, 13-15, 18-20, 29, 30, 35, 36, 39 and 40, this necessitated assigning additional SEQ ID NOS: and renumbering of some sequences which had already been assigned identifiers in the application as filed.

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-511, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "FastSEQ" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,

Matthew E. Hinsch
